The Structure of Occupational Mobility in the U. S. Economy:

OCCUPATIONAL CODE TRANSFORMATIONS, PROBABILITY TRANSITION (P) MATRIX, AND RECRUITMENT DEPENDENCE (R) MATRIX

by

Robert C. Dauffenbach, Jr.

Center for Advanced Computation
University of Illinois at Urbana-Champaign
Urbana, Illinois 61801

December 1973

This work was supported in part by a grant from the U. S. Department of Labor (Grant No. 91-17-73-06 from the Manpower Administration under Title I of the Manpower Development Training Act of 1962), and was submitted in partial fulfillment of the requirements for the degree of Doctor of Philosophy in Economics in the Graduate College of the University of Illinois at Urbana-Champaign, October 1973.

ABSTRACT

This appendix, which is supplementary to CAC Document No. 103 entitled "The Structure of Occupational Mobility in the U. S. Economy," includes a listing of the occupational code transformations of Census to "use" codes and computer print-outs of the probability transition (P) and recruitment dependence (R) matrices. Computational methods are discussed in chapter five of the aforementioned document. In order to increase readability of the matrices, coefficients identical to zero appear as blanks; those which round to zero are printed, however.

Abstracts

This appendix, which is supplementary to CAC Document No. 103 entitled "The Structure of Occupational Mobility in the U. S. Economy," includes a listing of the occupational code transformations of Census to "use" codes and computer print-outs of the probability transition (P) and recruitment dependence (R) matrices. Computational methods are discussed in chapter five of the aforementioned document. In order to increase readability of the matrices, coefficients identical to zero appear as blanks; those which round to zero are printed, however.

Key Words and Document Analysis. 17a. Descriptors

Occupational Code Transformations
Probability Transition Matrix
Recruitment Dependence Matrix
